**35C-WHPD Permissible Diesel Scoop**  
Non-Permissible Model Available

Being the best doesn't come easy. It takes commitment, integrity, and the kind of hard work only a miner can appreciate. At Fairchild International, we're no stranger to hard work. We've been in the field and in the mines our entire lives, working beside you to build tough, reliable equipment that will live up to your demanding needs. Our equipment line features exceptional design characteristics, which include stronger frames, more power motors, larger buckets, rugged John Deere axles, and ball bearing center sections.

From the maximum efficiency in low coal all the way up to higher seam heights, the flexibility of our scoop line up will be built to custom fit your application. Our service and support are as reliable as our machines.

## PROVEN AC PERFORMANCE

Fairchild International introduces the industry's first AC Drive Scoop Line to its series of battery-powered Workhorse Scoops.

At Fairchild International, we're committed to using the latest technology in our **field-tested, battery-powered AC Drive scoops**, ideally suited for slope graded mines.

Our AC Drive Workhorse Scoops are equipped with a Baldor 25HP pump motor, optional dual 75HP tram motors, and gear reducers. The units also feature EnerSys batteries that increase battery life cycles while decreasing motor maintenance costs, a Magnetek variable frequency drive, heavy-duty frame for larger bucket capacity, expanded operator's door and John Deere inboard planetary axles with wet disc service brakes.

To learn more about Fairchild's newest field-tested AC Drive Scoop Line, call us at 540-726-2380, e-mail [sales@fairchildint.com](mailto:sales@fairchildint.com) or visit [www.fairchildint.com](http://www.fairchildint.com)

"We are pleased to be part of the testing of the new AC tram Fairchild Scoop. This machine is truly a Workhorse. The performance, battery life, and availability are excellent. Our operators and maintenance personnel have only the highest comments concerning this machine."

Carl Estep  
Maintenance Manager  
Coal River Energy

### The Mining Industry's First Proven AC Drive Scoop Line

- > Two Dual Tram Models:
  - 35C-WH2-30-AC Workhorse Scoop
  - 35C-WH2-25-AC Workhorse Scoop
- > One Single-Tram Model 35C-WH-AC Workhorse Scoop
- > Our Exclusive Retrofit DC-to-AC Rebuild
- > Machine Torque is Greater than Any Scoop on the Market
- > Increased Tram Speed
- > Battery has *Twice the Life* of DC Units
- > Significantly Lower Drive Heat Eliminates Costly Motor and Cable Replacement or Repairs

***Our Proven Performance, Availability and Tram Speed Dominates All Other Scoops on the Market!***
