

LONGWALL EFFICIENCY

At Fairchild International, we're committed to using the latest industry technology in our **field tested, battery powered Variable Frequency Drive 36S-AC Shield Hauler**.

This vehicle has proven stability under heavy loading in longwall operations with significantly lower electrical heat; eliminating costly motor and cable replacement or repairs. The 36S-AC features state-of-the-art technology and exceptional design characteristics throughout the machine, including dual 75HP tram motors, 72-84 inch fork length, and large capacity scoop bucket. The vehicle is equipped with 48-inch tires with durable inboard planetary axles.

To learn more about how our equipment can improve your mining efficiency and production please give us a call at 540-726-2380, or email sales@fairchildint.com
